PROFILE

Versatile full stack web developer that has 8 years of web development experience, 6 years of PHP stack experience, 5 years of JavaScript stack experience, and has been a part of teams building SaaS applications now in the hands of thousands. Able to turn design into structured and well-written code using popular frameworks.

EXPERIENCE

WICKET

Senior Web Developer | August 2023 – Present

Key Achievements:

- Developed a configurable toolkit to shorten projects from 24 months to 2 months using PHP, AlpineJS/JS, and SASS/SCSS.
- Developed custom PHP integrations between the Wicket Member product and 3rd party tools to speed up implementation from 5 months to 2 weeks.
- Proposed the now-active branding for our products.
- Created documentation for new and existing best-practices.
- Owned client software launches.

GRAVITYWIZ

Contract Support Engineer | April 2023 – July 2023

Key Achievements:

- Contributed new code snippets in PHP and JavaScript to our GIT repo that let users customize their product experience.
- Improved our software products by re-creating customer issues, identifying breaking edge cases, documenting them, and/or suggesting a fix.

POWER TO CHANGE

Full Stack Web Developer & Analyst | August 2019 – April 2023

Key Achievements:

- Rebuilt the donation process for the organization by leveraging the existing API and creating a low-friction, pleasant experience on top of it in WordPress, PHP and JavaScript, allowing a smoother donation experience.
- Built and designed new streamlined websites for sub-brands in PHP/WordPress and Laravel/Statamic, while following the provided Adobe XD and Figma designs with pixel-perfect accuracy.
- Automated repetitive data-entry tasks with Python to close lagging communication gaps between departments.

SKILLS

PHP
Laravel
JavaScript
Node.js
React.js
React Native
Vue.js
MySQL
Postgres
Ruby on Rails
Tailwind CSS
Django
Python

C++
Git
Webpack
Redux
Docker
WordPress
Shopify Development

TRAINING

Degree in CIS
Certificate in CIS
Certified UX Designer
Certified A+ Engineer
Certified Network+ Engineer

PORTFOLIO

CoulterPeterson.com:

My personal portfolio site where I outline my experience and demonstrate my eye for both clean design and nerd flare.

- Worked on the Salesforce implementation team, which involved a custom SQL sync with the legacy CRM.
- Built an MVP marketing game with the Unity Game Engine.

22APPS NO-CODE APP BUILDER

Contract Lead Developer | December 2019 – June 2021

Key Achievements:

- Built the user authentication features, as well as the PHP-based API so it could be connected to website signups, the actual React/Node.js builder, and more.
- Heavily customized the website with PHP, JS, and CSS to match the client's needs in triggering automated workflows when a user signed up for a trial, purchased, referred someone, etc.
- Led the development team through each phase of the project, and coordinated milestone requirements with the client.
- Consulted on the best methodologies for automatically deploying a cross-platform codebase to Android and iOS, based on the user's customizations in the React-based web builder.

WP ENGINE / FLYWHEEL

Contract Full Stack Web Developer | December 2019 – July 2020

Key Achievements:

- Developed the broken link checker feature that runs within the Local Electron app, to speed up safe deployments of websites. Utilized React, Node.js, TypeScript, and PHP.
- Internal API testing, documentation, and development.

ASPEN GROVE STUDIOS (WP ZONE)

Contract Full Stack Web Developer | April 2019 – September 2019

Key Achievements:

- Resolved user complaints in product lineup through writing new and refined code in PHP, React.js, and Node.js.
- Added new features such as a custom Single-Sign-On (SSO) solution, deeper integrations with existing products (utilizing SCSS, PHP, React.js, and more), and reviving previously shelved software to be ready for production sales.

FIRSTPAGE MARKETING

Full Stack Web Developer | October 2018 – March 2019

Key Achievements:

- Built client websites from provided .PSD files using PHP, WordPress, WooCommerce, JavaScript and CSS.
- Performed speed optimization and OWASP security hardening on client websites.
- Developed product ReviewInstantly with PHP, JS and MySQL.
